RUSH sequence search for 09/506,079

Please approve and forward to STIC the following RUSH sequence search request. This is for an amendment due this biweek. Thanks.

Please search the following for 09/506,079:

commercial and interference databases oligomer search of SEQ ID NO: 1(aa)

commercial and interference databases oligomer search of SEQ ID NO: 2(aa)

SEQ ID NO: 1 is a fragment of SEQ ID NO: 2.

                                                                                                                                                              The invention relates to novel HER-2 (herstatin-2) antagonist particularly a polypeptide that binds to the extracellular domain (ECD) of HER-2 at a site that is different from the binding site of humanised antibody, Herceptin, at an affinity of at least 10°8. The present invention is based upon the initial discovery of an alternative HER-2 mRNA transcript with 274 bp insert of intron 8. The translation product of the alternative transcript is a truncated HER-2 protein designated p68HER-2 which lacks the transmembrane and intracellular domains of
                                                                                  Sequence
                                                                                                                        p185HER-2 but contains ECD I, II of the p185HER-2 and the novel ECDIIIa. The ECDIIIA-containing polypeptides bind tightly to, and thus antagonise the HER-2 receptor. The peptides, which bind to an HER-2 ECD, and the nucleic acids encoding these are useful to treat, diagnose and identify
                                                                                                                                                                                                                                                             Claim
